EXPERIENCE

DevOps Intern

Mar 2026 – Jun 2026

Bharti Airtel (Xtelify Ltd.)

Noida, UP

– Application Log Pipeline

Built an application log pipeline (Filebeat → Kafka → Logstash → Elasticsearch), ingesting and indexing application and access logs for real-time search by Devops, Techops, and AIOps teams

– Infrastructure Metrics Pipeline

Implemented infrastructure metrics collection using Zabbix Agent/Server, tracking CPU, memory, disk, and network health across production systems, and integrated parsed metrics into Elasticsearch

Cut manual log and metric retrieval effort for the Devops team by **40%** through centralized, searchable pipeline architecture

PROJECTS

HireSense | *Python, FastAPI, LLMs* | *In Progress*

- Building an advanced, LLM-powered evolution of an earlier NLP resume parser, using a modular backend architecture to parse resumes of any format and structure beyond rule-based/NER extraction

AI-Based Resume Parser | *Python, NLP, FastAPI* | GitHub

- Parsed resumes of any format using spaCy NER pipelines and custom Regex patterns; serialized extracted entities (skills, education, experience, contacts) into structured JSON via FastAPI REST endpoints
- Built modular FastAPI routes with Pydantic schema validation for request/response handling, enabling plug-and-play integration with external ATS and HR platforms

Expense Tracker Application | *Flutter, Firebase* | GitHub

- Implemented full CRUD on Cloud Firestore with user-scoped document references and real-time StreamBuilder listeners for live UI sync across Android and iOS
- Integrated Firebase Auth (email/password) with UID-based Firestore security rules for session management and per-user data isolation

CERTIFICATIONS

AWS Academy Graduate — Cloud Foundations

Nov 2025

- 20-hour program covering AWS core services — compute (EC2), storage (S3), networking (VPC), databases, security, and cloud architecture fundamentals

EDUCATION

Jaypee University of Information Technology (JUIT)

2023 – 2027

B.Tech in Computer Science Engineering, Specialization in AI & ML

Solan, Himachal Pradesh

TECHNICAL SKILLS

Languages: C++, Python, Dart, SQL, Kotlin, HTML, CSS, JavaScript

Frameworks / Tools: FastAPI, Flutter, Firebase, Git, GitHub, Android Studio, VS Code

Cloud / DevOps / Observability: Elasticsearch, Kafka, Logstash, Zabbix, AWS Cloud Foundations, Monitoring

ML / NLP Libraries: NumPy, Pandas, scikit-learn, spaCy, Regex

Core Subjects: DSA, DBMS, Operating Systems, Computer Networks, OOP
